SUPPLEMENT TO  
REPORT NO.

## SOURCE

1. Four cranes are located on the old deratization pier. Only one of the four is in working condition and it is situated on the north side of the pier. It is an electric crane and has a three ton capacity.
2. On the south side of the pier near the end, there is a 40 ton crane in working condition, but useless today because it has a fixed spar and therefore cannot be used on tall sided ships.
3. Near this crane there are two other electric cranes out of commission because the spars are bent. The capacity of these cranes is three tons each. When source inquired about these two cranes the pilot told him "Those blasted Communists destroyed them". No efforts are being made to recommission this equipment.
